EDUCATION

Universitas Indraprasta PGRI (Unindra)

Bachelor of Science: Informatics Engineering

Jakarta, Indonesia

Aug 2022 – 2026

Relevant Coursework: Data Structures and Algorithms, Database Systems, Web Programming, Decision Support Systems, Expert Systems, Digital Image Processing, Neural Networks.

Thesis: Customer Segmentation Using K-Means Clustering for Marketing Strategy in Online Marketplace Transactions: A Case Study of a Thai Marketplace.

SMKN 1 Cibinong

Software Engineering (Vocational)

Bogor, Indonesia

2019 – 2022

EXPERIENCE

MTs Alawwabin

Project-Based Intern

Bogor, Indonesia

Oct – Nov 2025

- Built a Learning Management System (LMS) using Laravel and Tailwind CSS, including role-based access for teachers and students.

PT Karya Data Infotama

Intern

Jakarta, Indonesia

Aug – Nov 2021

- Built a web-based landing page and supported system documentation (user manual) and data entry for an internal information system.

Unindra MKWK 2025 Committee

Volunteer Web Developer & Certificate Designer

Jakarta, Indonesia

2025

- Built a JavaScript-based learning website and designed participant certificates for a university-wide course event.

PROJECTS AND SKILLS

Projects: ShannaMakeup Booking Platform: full-stack booking system for a makeup artist business (Next.js, Prisma, Neon DB, Google OAuth, Vercel).

SentiFood GoFood Review Sentiment Analysis: sentiment classifier using Multinomial Naive Bayes built from scratch (PHP), with Indonesian text preprocessing and precision/recall/F1 evaluation.

Cassava Leaf Disease Classification: image-classification web app using SVM with 65 engineered features (GLCM, HSV, LBP); tuned via grid search to 70.5% accuracy (Python, scikit-learn, Flask).

Customer Segmentation for Facebook Marketplace: clustering tool segmenting customers by behavior for targeted engagement (Python, Streamlit, K-Means).

Book Scanner: computer-vision tool for automatic document edge detection and cropping (Python, OpenCV, YOLOv8n-seg).

Technology: PHP (Native & Laravel), Python, Kotlin, TypeScript/JavaScript, Tailwind CSS, MySQL, Prisma, Git/GitHub, Vercel.

AI / Data: OpenCV, YOLOv8, scikit-learn (SVM, K-Means), Naive Bayes, Streamlit, Gemini API, WhatsApp API (WAHA).

Languages: Indonesian (native), English (professional working proficiency).
